ABOUT US

SANADREN MEDICAL DEVICE & HEALTH CARE

Sanadren® comes from the knowledge of the silicone materials used for the preparation of semi-occlusive patches for the treatment of keloids and hypertrophic scars, stretch marks, skin lesions and burns. Observing the international studies on the topic, the products obtained, the effectiveness and the cost/benefit ratio, we identified the need for importing onto the market clothing, plates, tubes, fine craftsmanship in the technique, for maximum ergonomics, exceptional comfort and an optimal practicality.

We have designed and manufactured a complete line called Osmodren®-Ceroxyl composed of patch-sheaths, made in various sizes and compression levels, which can be used for various topical treatments associated with pharmaceutical preparations, parapharmaceutical, herbal, recommended on/after prescription or for self-medication.

We operate in: orthopedics, phlebology, rheumatology, plastic surgery, dermatology.

We market products: physiotherapy, parapharmaceutical and consumer health.

ABOUT US

SANADREN MEDICAL DEVICE & HEALTH CARE

Our purpose is to help the lymphatic system to expel the bulky waste of the human body. Today you may include a comfortable and functional garment that occluding with the action of the silicone film increases the drainage capacity, favoring microcirculation, leaving the maximum perspiration induced by the gas-permeability of medical grade silicones, and ensuring the spontaneous overproduction of collagen and elastin which also provides aesthetic improvement of the dermis.

The compression garments made of medical grade silicone increase the return flow to the heart and significantly reduce the venous insufficiency, i.e. the swelling of the lower limbs discomfort, limiting conspicuously the first varicose veins and containing cronicizzante the rapid action of the PEF.

The products are recommended for: elastocompression + drainage, reordering stimulation of fibroblasts, stimulation of elastin and collagen by the action of the medical

silicones, electrostatic action due to the action of silicon derivatives on the proliferation of fibroblasts and keratinocytes. Therefore we are confident of the commercial success of our products relative to the benefits scientifically proven by all the world's most prestigious universities, adopted by the leading companies engaged in the preparation of medications and medical devices.

Our silicone, applied on natural cotton fibers, gels and creates a biocompatible and gas-permeable membrane (breathing), it allows an ion exchange between oxygen and carbon dioxide, (attracts the surface water molecules loaded with toxins - not metabolized that create inflammatory states), while simultaneously frees the mineral oil gently hydrating the skin helping the filling semi-permeable osmotic. The contact with the garment softens the skin without the use of additional creams or lotions (rehydration of the stratum corneum to the osmosis effect).

Dermaxsyl Stretch Marks Oil

SANADREN MEDICAL DEVICE & HEALTH CARE

DESCRIPTION

Pure biocompatible silicone oil of medical grade. Preventive treatment for all types of stretch marks.

CHARACTERISTICS / PROPERTIES

New formulation and mixing of pure compounds, manufactured through the use of oils of silicones titrated at an international medical and scientific level, useful for the treatment and prevention of stretch marks.

INDICATED FOR

Stretch Marks Oil is a medical oil containing pure medical grade silicone oils that act by protecting the treated tissue from the outside, helping to favor the proper level of hydration of the treated area and to prevent the origin of stretch marks. After the application of the product, on the surface it will be generated a protective and non-occlusive barrier/ film, which due to its breathable characteristic assists the maintainance of the proper level of hydration, useful in the healing process, helping to reduce dryness, itching and redness.

INGREDIENTS / COMPOSITION

Dimethyl Siloxane

Trimethylsiloxy-Terminated

Gum Blend Dimethicone

(Silicone Medical Class 1 / No Cosmetical Silicones)

APPLICATION / USE

Stretch Marks Oil is a coadjuvant in the treatment of various types of stretch marks. Use the product only on intact skin. Recommended treatment: 40-60 days. Store in a cool and dry place, away from heat sources and direct sunlight.

CONTRAINDICATIONS AND ITERATIONS

Avoid contact with eyes and mucous membranes. In case of accidental contact, rinse with plenty of water. Do not swallow. Keep out of reach of children. You should consult your doctor before using the product on children. No known side effects or contraindications related to the use of the oil. It is recommended not to use the product in case of known hypersensitivity to one or more components of the product. If redness or skin irritation comes out, it is recommended to discontinue treatment. If symptoms persist, contact your doctor or pharmacist.

TOXICITY

None

BENEFITS

Stretch Marks Oil stimulates the growth of new collagen and elastin and leads to rapid healing of the skin. It stimulates the physiological growth of the cellular matrix and connective tissue. One of the advantages of this material is its great stability, high resistance to ultraviolet radiation, acids, alkalis and electrical charges. This is due to the chemical origin of silicon and the strong ties that characterised it. The silicone is insoluble in water but is permeable to water vapor; This gives the skin a good transpiration and prevents injuries such prickly heat injury, which often occur when an occlusive products is used. Another important feature is its substantivity, i.e. the ability to generate a film adhering to the keratin of both the skin and the hair.

Dermaxsyl Scar Gel

SANADREN MEDICAL DEVICE & HEALTH CARE

DESCRIPTION

Pure biocompatible silicone gel of medical grade. Preventive treatment for skin lesions from pressure.

CHARACTERISTICS / PROPERTIES

New formulation and mixing of pure compounds, manufactured through the use of silicones titrated at an international medical and scientific level, useful for the treatment and prevention of injury, small wounds, dermal abrasion, hypertrophic scars and keloids.

INDICATED FOR

Scar Gel is a medical formula containing pure medical grade silicon that acts protecting the scar tissue from the outside, helping to encourage the right level of hydration of the treated area and to prevent the origin of hypertrophic keloids. After the application of the product, on the surface it will be generated a protective and non-occlusive barrier/film, which due to its breathable characteristic assists the maintenance of proper level of hydration, useful in the healing process, helping to reduce dryness, itching and redness.

INGREDIENTS / COMPOSITION

Dimethicone Arten pur
Dimethicone
Dimethicone crosspolymer
Dimethicone Trimethylsilylicate
(Silicone Medical Class 1 / No Cosmetical Silicones)

APPLICATION / USE

Scar Gel is a coadjuvant in the treatment of atrophic and hypertrophic scars, sclerotic, keloids, scars from burns, caused by removal of tattoos, post-surgery scars, pigmented scars, and various types of stretch marks. Use the product only on intact skin. Recommended treatment 40-60 days. Store in a cool and dry place, away from heat sources and direct sunlight.

CONTRAINDICATIONS AND ITERATIONS

Avoid contact with eyes and mucous membranes. In case of accidental contact, rinse with plenty of water. Do not swallow. Keep out of reach of children. You should consult your doctor before using the product on children. No-known side effects or contraindications related to the use of the gel. It is recommended not to use the product in case of known hypersensitivity to one or more components of the product. If redness or skin irritation comes out, it is recommended to discontinue treatment. If symptoms persist, contact your doctor or pharmacist.

TOXICITY

None

Another important property is its substantivity, i.e. the ability to generate a film adhering to the keratin both of the skin and the hair.

Three Elements

SANADREN MEDICAL DEVICE & HEALTH CARE

DESCRIPTION

Plaster in pure medical grade silicone gel for the treatment of wrinkles (lifting effect). Treatment derived from the methods of prevention and administration of recent or previous scars; stimulation of collagen and elastin.

CHARACTERISTICS / PROPERTIES

New formulation and mixing of pure compounds, manufactured through the use of silicones titrated at an international medical and scientific level, useful for the treatment and prevention of wrinkles, hypertrophic scars and keloids.

INDICATED FOR

Three Elements contains pure medical grade silicone that acts protecting the scar tissue from the outside, helping to favor the proper level of hydration of the treated area and to prevent the origin of hypertrophic keloids. After the application of the product, on the surface it will be generated a non-occlusive barrier, which due to its breathable characteristic assists the maintenance of the proper level of hydration useful in the healing process, helping to reduce skin dryness, itching and redness.

INGREDIENTS / COMPOSITION

Patch: PATCH OF SILICON MEDICAL CLASS I

Hyaluronic Serum: Citrus Sinensis Fruit Water, Aqua, Methylpropanediol, Sodium hyaluronate, Glycine soja protein, Glyceryl undecylenate, Potassium sorbate (totally free from traditional preservatives: only vegetal and natural preservatives).

Scar Gel: DIMETHICONE ARTEN PUR, DIMETHICONE, DIMETHICONE CROSSPOLYMER, DIMETHICONE, TRIMETHYLSILOXYLICATE

APPLICATION / USE

Gently cleanse your skin with warm water and neutral detergent, dry the area to be treated, apply a few drops of Hyaluronic Serum, then place the plaque on the neck for a minimum of 25 minutes.

It is recommended to carry out the treatment in a moment of relaxation, maintaining the plaque very adherent on the skin. Cleanse the plate with water and neutral soap, dry and replace the plaque on the protective film. Finally the silicone gel applied to the skin is essential to stimulate the production of collagen. The skin will be more toned and hydrated from the first application.

CONTRAINDICATIONS AND ITERATIONS

Avoid contact with eyes and mucous membranes. In case of accidental contact, rinse with plenty of water. Do not swallow. Keep out of reach of children. You should consult your doctor before using the product on children. No known side effects or contraindications related to the use of the product. It is recommended not to use the product in case of known hypersensitivity to one or more components. If redness or skin irritation comes out, it is recommended to discontinue treatment. If symptoms persist, contact your doctor or pharmacist.

TOXICITY

None

BENEFITS

Three Elements stimulates the growth of new collagen and elastin and leads to rapid healing of the skin. It stimulates the physiological growth of the cellular matrix and connective tissue. Hypoallergenic, biocompatible, non-cytotoxic, bacteriostatic.

Plaster Eye Contour

SANADREN MEDICAL DEVICE & HEALTH CARE

DESCRIPTION

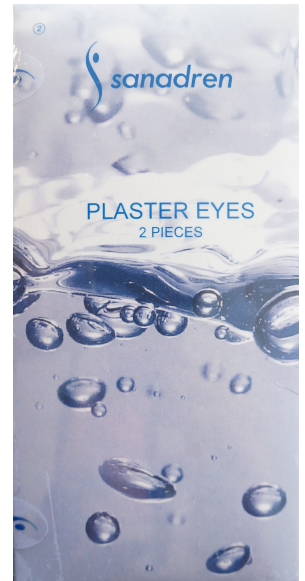

Plaster in pure silicone of medical grade, biocompatible, bacteriostatic, non-cytotoxic, non-allergenic

CHARACTERISTICS / PROPERTIES

Draining, moisturizing, protecting, anti-aging, reduces swelling and scarring, improves appearance of skin lesions

INDICATED FOR

Suitable for edemas, scars and skin lesions in general (closed and non-bleeding)

INGREDIENTS / COMPOSITION

Silicone Gel Medical Class 1 / No Cosmetical Silicones
Siliconic Elastomer of Medical Grade

APPLICATION / USE

Apply to the affected area ONLY on closed scars

CONTRAINDICATIONS AND ITERATIONS

There are no known side effects. Once you remove the patch we recommend the use of a drop of Scar Gel on the affected area

TOXICITY

None

BENEFITS

The perfect adhesion and gas-permeability allow perspiration and bacteriostatic action.

The continuous and constant application over the scar/edema accelerates the absorption treatment with surprisingly fast results

Plaster Gel Mask

SANADREN MEDICAL DEVICE & HEALTH CARE

DESCRIPTION

Mask made for post-surgical treatment (blepharoplasty)

CHARACTERISTICS / PROPERTIES

Draining, moisturizing, protecting, anti-aging, reduces swelling and scarring, improves appearance of skin lesions

INDICATED FOR

INGREDIENTS / COMPOSITION

Polyamide

Cotton

Elastomer

Silicones Gel Med.Class 1

APPLICATION / USE

The device is used as a simple mask. It is recommended to use in a situation of complete relaxation and stress relief, or during sleeping hours

CONTRAINDICATIONS AND ITERATIONS

There are no known side effects. Once you remove the patch we recommend the use of a drop of Scar Gel on the affected area

TOXICITY

None

BENEFITS

Draining, moisturizing, protects and smoothes

DESCRIPTION

Sheath with elastic compression for post liposuction surgery with open design at the crotch, made of medical grade silicone gel, bacteriostatic, draining properties, gas-permeable. Built for professional use. It favors dermal regeneration; compacts dermal tissues treated by post-liposuction; limits the formation of scars and injuries; reduces post-surgical rehabilitation times. Made of pure class 1 medical grade silicone gel, gas-permeable, non-toxic, hypoallergenic, bacteriostatic.

CHARACTERISTICS / PROPERTIES

It improves microcirculation and oxygenates the adipose tissues through its peculiar osmotic draining. In particular, it favors the discharge of toxins, the increase of diuresis and the drainage of excess liquid. It also carries out anti-inflammatory action, it stimulates the production of elastin and collagen,

INDICATED FOR

Water retention, lymphedema, localized weight loss, joint pain, muscle pain, joint overwork, relaxation of muscles, inflammatory lesions.

INGREDIENTS / COMPOSITION

Polyamide
Elastane
Elastomer
Silicones Gel Med.Class 1

APPLICATION / USE

This is used as a simple garment. It is worn taking care to spread the shirt well. Treatment recommended 14-20 days.

CONTRAINDICATIONS AND ITERATIONS

It is not recommended for people suffering from mild or serious thrombosis, diabetic, venous insufficiency and women in a state of pregnancy. Keep out of reach of children. It is suggested to seek the advice of the treating physician.

TOXICITY

None

BENEFITS

Fast dermal regeneration of the treated areas. Increases urine output without any addition of liquid within the diet. In this way, it helps the body to expel toxins. Its major innovation consists in triggering a mechanical action on the body, creating the phenomenon of osmosis, or the ability to attract and excrete excess fluids.

DESCRIPTION

Osmotic garment indicated for localized slimming, water retention, cellulite, vascular disorders, inflammatory states. Made of microfiber and coated in class 1 medical grade silicone gel. Biocompatible and gas-permeable. Does not heat and does not cause prickly heat effect.

CHARACTERISTICS / PROPERTIES

It improves microcirculation and oxygenates the adipose tissues through its peculiar osmotic draining. In particular, it favors the discharge of toxins, the increase of diuresis and the drainage of excess liquid. It also carries out anti-inflammatory action, it stimulates the production of elastin and collagen, improves the absorption of skin care substances, tones muscle mass and reduces after treatment edemas. improves the absorption of skin care substances, tones muscle mass and reduces the after treatment edemas.

INDICATED FOR

Cellulite (Panniculopatia), water retention, lymphedema, localized weight loss, joint pain, muscle pain, joint overwork, bruises and sprains, circulatory disorders, muscle relaxation, traumatic contractures, inflammatory injuries, sports injuries, treatment and prevention of PEF stages (cellulite).

INGREDIENTS / COMPOSITION

Polyamide
Elastane
Elastomer
Silicones Gel Med. Class 1

APPLICATION / USE

Wear for at least six hours a day (recommended time). It is used as a simple garment. It is worn taking care to spread the shirt well. After two / four applications wash the garment with warm water and neutral detergent (Gentle washing in water at 30°C by hand). Allow to dry away from heat sources. Store in a dry place. Recommended treatment: 40-60 days. To increase benefits, after this period it is recommended to replace the garment with a lower size model.

CONTRAINDICATIONS AND ITERATIONS

It is not recommended for people suffering from serious or mild thrombosis, diabetic, venous insufficiency and women in a state of pregnancy. Keep out of reach of children. It is suggested to seek the advice of the treating physician.

TOXICITY

None

BENEFITS

The most important action of the sheath is to increase urine output without any addition of liquid within the diet. In this way, it helps the body to expel toxins that if accumulated over time, may cause various pathologies. Its major innovation consists in triggering a mechanical action on the body, creating the osmosis phenomenon, or the ability to attract and excrete excess fluids.

Cerox syl® Bra

SANADREN MEDICAL DEVICE & HEALTH CARE

DESCRIPTION

Osmotic garment for post-breast surgery, with front opening. Made of microfibre and coated in class 1 medical grade silicone gel. Biocompatible and gas-permeable. Does not heat and does not cause the prickly heat effect.

CHARACTERISTICS / PROPERTIES

It improves microcirculation and oxygenates the tissues through its peculiar osmotic draining. In particular, it favors the discharge of toxins and drains excess liquid. It also plays an anti-inflammatory action, stimulates production of elastin and collagen, improves the absorption of skin care substances, tones muscle mass and reduces post-treatment edemas.

INDICATED FOR

Recommended for treating minor injuries such as scars or skin fissures.

INGREDIENTS / COMPOSITION

Polyamide
Elastane
Elastomer
Silicones Gel Med.Class 1

APPLICATION / USE

Garment with front opening. It is used as a simple garment. It is worn rolling out the shirt well. Please consider to follow your doctor's instructions first

CONTRAINDICATIONS AND ITERATIONS

It is not recommended for women who are in state of pregnancy. Keep out of reach of children. It is suggested to ask the opinion of the treating physician.

TOXICITY

None

BENEFITS

Toning and firming medical garment, it acts protecting the scar tissue from the outside, it helps to favor the right hydration of the treated area and to prevent the formation of keloids. Thanks to its transpiration property, it allows to maintain the proper level of hydration useful in the process of healing, helping to reduce skin dryness, itching and redness.

DESCRIPTION

Osmotic garment indicated for localized slimming, water retention, vascular disorders, inflammatory conditions. Made of microfiber and coated in class 1 medical grade silicone gel. Biocompatible and gas-permeable. Ceroxyl abdominal bandage also creates flow additive action and reduces edemas. It does not heat and does not cause the prickly heat effect. Please note: Garment also used in the post-surgery phase (Abdominoplasty)

CHARACTERISTICS / PROPERTIES

It improves microcirculation and oxygenates the adipose tissues through its peculiar osmotic draining. In particular, it favors the discharge of toxins, the increase of diuresis and the drainage of excess liquid. It also carries out anti-inflammatory action, it stimulates the production of elastin and collagen, improves the absorption of skin care substances, tones muscle mass and reduces after treatment edemas.

INDICATED FOR

Water retention, lymphedema, localized weight loss, muscle aches, bruises, circulatory disorders, muscle relaxation, traumatic contractures, inflammatory lesions, sports injuries.

INGREDIENTS / COMPOSITION

Polyamide
Elastane
Elastomer
Silicones Gel Med. Class 1

APPLICATION / USE

Wear for at least six hours a day (recommended time). It is used as a simple garment. It is worn taking care to spread the shirt well. After two / four applications wash the garment with warm water and neutral detergent (Gentle washing in water at 30°C by hand). Allow to dry away from heat sources. Store in a dry place. Recommended treatment: 40-60 days. To increase benefits, after this period it is recommended to replace the garment with a lower size model.

CONTRAINDICATIONS AND ITERATIONS

It is not recommended for people suffering from serious or mild thrombosis, diabetic, venous insufficiency and women in a state of pregnancy. Keep out of reach of children. It is suggested to seek the advice of the treating physician.

TOXICITY

None

BENEFITS

The most important action of the abdominal bandage is to increase the urine output without any addition of liquid within the diet. In this way, it helps the body to expel toxins that if accumulated over time, may cause various diseases. Its major innovation consists in triggering a mechanical action on the body, creating the phenomenon of osmosis, or the ability to attract and excrete excess fluids.

DESCRIPTION

Osmotic garment suitable for vascular disorders, inflammatory conditions, sports injury. Made of microfibre and coated in class 1 medical grade silicone gel. Biocompatible and gas-permeable. Does not heat and does not cause the prickly heat effect.

CHARACTERISTICS / PROPERTIES

Improves microcirculation, it favors the discharge of toxins and activates the drainage of excess liquid. It also plays an anti-inflammatory action, it stimulates the production of elastin and collagen, improves the absorption of skin care substances, it tones the muscles and reduces after-treatment edemas

INDICATED FOR

Water retention, lymphedema, joint pain, muscle pain, joint overwork, bruises and sprains, circulatory disorders, muscle relaxation, traumatic contractures, inflammatory injuries, sports injuries.

INGREDIENTS / COMPOSITION

Polyamide

Elastane

Elastomer

Silicones Gel Med.Class 1

APPLICATION / USE

Wear for a minimum of two up to six hours per day (recommended time). It is used as a simple garment. It is worn taking care to spread the shirt well. After two / four applications wash the garment with warm water and neutral detergent (Gentle washing in water at 30°C by hand). Allow to dry away from heat sources. Store in a dry place.

CONTRAINDICATIONS AND ITERATIONS

It is not recommended for people suffering from serious or mild thrombosis, diabetic, venous insufficiency and women in a state of pregnancy. Keep out of reach of children. It is suggested to seek the advice of the treating physician.

TOXICITY

None

BENEFITS

It helps to eliminate toxins that if accumulated over time, may cause various diseases. Its great innovation consists in triggering a mechanical action on the body, creating the osmosis phenomenon, or the ability to attract and excrete excess fluids.

Cerox syl® Pipe wrist

SANADREN MEDICAL DEVICE & HEALTH CARE

DESCRIPTION

Osmotic garment recommended against water retention, cellulite, vascular disorders, inflammatory conditions. Made of microfiber and coated in class 1 medical grade silicone gel. Biocompatible and gas-permeable. Does not heat and does not cause prickly heat effect.

CHARACTERISTICS / PROPERTIES

Improves microcirculation, it favors the discharge of toxins and activates the drainage of excess liquid. It also plays an anti-inflammatory action, it stimulates the production of elastin and collagen, improves the absorption of skin care substances, it tones the muscles and reduces after-treatment edemas.

INDICATED FOR

Water retention, lymphoedema, body aches, joint overwork, bruises and strains, circulatory disorders, relaxation of muscles, traumatic contractures, inflammatory injuries, sports injuries.
